## PROFESSIONAL SUMMARY

Software/Mobile Developer passionate about technology and growth with 2 years of experience in mobile app development using flutter and game development using unity. Experienced with all stages of the development cycle for dynamic mobile projects. Well-versed in numerous programming languages including Dart, and python. Constantly striving to learn new technologies and look for ways to become better in this rapidly changing industry.

---

## EXPERIENCE

### MOBILE AND GAME DEVELOPER

*Jan 2019 - present | KAH Studios , Nigeria*

- Worked on three different apps (Bible Verse Master, Cinema Ninja, and KAH Comics App) as part of the project for both iOS and Android platforms using Flutter as a hybrid solution.
- Designed and developed many highly-promoted features for KAH Comics App Application using Flutter. Involved in the entire software development process for the project: Requirement Specification, Design, Implementation, and Testing.
- Used RESTful API services and AppSync for retrieving, updating, and deleting data usually in JSON or XML format.
- Integrated Firebase services and Google ads into the application.
- Translated basic design plans into full iOS app frameworks, delegating project components to appropriate team members.
- Using GetX and Provider state-management framework.
- I successfully programmed and launched a game for the studio named Kuubu using Unity which is currently live on the play store.
- I successfully created a bible quiz app named Bible Verse Master using flutter which is currently live on the play store and app store.
- Use of firebase as a backend.

### PROJECT MANAGER

*Mar 2021 - Jun 2021 | Amorvita Inc. , Canada, Remote*

- Managing the development team of 4 to create a functional e-learning website, while ensuring tasks are delivered on time and stakeholders are updated accordingly.
- Completely scoped, planned, and achieved 100% completion of weekly tasks by managing the execution of the company product launch and working with our international Associates and the company's CEO.
- Developed a process to automate company activities resulting in an 80% increase in efficiency and project delivery.
- Transitioned tracking of daily tasks from personal emails to Asana which improved stakeholder's communication and visibility. Also resulted in 100% completion of daily deliverables.

### ASSOCIATE FIELD PROFESSIONAL – L/MWD

*Aug 2019 - Jul 2020 | Halliburton Energy Service Nigeria Limited , Nigeria*

- Effectively communicated with the Company man, Tool Pusher, Geologist, Mud Logger, Directional Driller, Driller, and other crew members to ensure a safe environment and deliver the Drilling Logs accurately.
- Delivered data to the stakeholders, ensuring each data was accurate, timely, and met the highest service quality standard possible. While acting as the key client contact.
- Worked on a rotational team of 4 to successfully deliver on the scope of the drilling project by proactively monitoring, reading, interpreting, and reporting formation well logs (Gamma and Resistivity), directional survey information, and other well site data.
- Provided on-site assistance of the Measurement- While-Drilling (MWD) process, including tool preparations, data acquisition, log generation and Quality Control (QC), and delivery of the services to the customer.
- Properly tested all tools and equipment before, during, and after each job. Identify and correct operational problems to prevent or minimize service impact.
- Protected and handled clients' data with high confidentiality.

### PROJECT MANAGEMENT TRAINEE

*Feb 2017 - Nov 2017 | Software Business Solutions Consulting , Nigeria*

- Prepare software requirement specification and planned testing activities for an ongoing project by ensuring the creation of test plan and test case capturing all scenarios and duly signed off by all stakeholders.
- Managed a team of three to carry out software application testing when new changes were implemented to ensure it meets client requirements and no defect/bug in the application.
- Successfully launched a facility management website; where I functioned as a Scrum master in a cross-functional team of 5

members including remote and onsite developers and designers, managed project scope, risks, deliverable outcomes, and dependencies.

- Acted as a key client contact and ensured executives' expectations were met and results were delivered while working on a CMS website for a Shipping company.

---

## EDUCATION

### B.ENG. MECHANICAL ENGINEERING

Covenant University , Ota, Ogun State, Nigeria | Graduated in 2016

### M.SC. PETROLEUM ENGINEERING AND PROJECT DEVELOPMENT

Institute of Petroleum Studies , Port Harcourt, Rivers State, Nigeria | Graduated in 2018

---

## PROJECTS

### CINEMANINJA

I worked on a mobile app as a full-stack developer. Implementing an app that runs on both ios and android using firebase as its backend. I created the UI and used a TMDB API. I was able to use Getx for the state management and Get Storage to hand some of the data locally in the device.

link: <https://linktr.ee/cinemaninja>

### KAH STUDIOS COMIC APP

I worked on a team of 4 to help design and program an app for reading comics. I used flutter to create the app and use Get for state management; I used firebase as its backend for user authentication and HTTP to communicate with Firebase Storage where the comic data are stored.

### BIBLE VERSE MASTER

On this project, I used Flutter/Dart to develop a Bible quiz app using packages like Provider and Getx for state Management. The app involves answering questions with a 15 sec counter limit. I used different functions to randomize the questions asked and the arrangement of the options. I also incorporated Google Banner Ad into the game for revenue generation.

Play Store: [https://play.google.com/store/apps/details?id=kahstudios.ng.bible\\_verse\\_master](https://play.google.com/store/apps/details?id=kahstudios.ng.bible_verse_master)

App Store: <https://apps.apple.com/us/app/bible-verse-master/id1600262252>

### NLNG TRAIN 7

The team and I worked on the tie-in design for the new train. I used AutoCAD to ensure all annotations and drawings met with standards and were properly labeled before the design was sent for approval. I also assisted the senior piping engineers to ensure our design done on PDMS met applicable standards.

### BENEPROJECTI

Functioned as the scrum master, working with the development team and product owner on delivering a Vessel inventory management platform to a client; we developed user stories. Each of these stories was developed as product features, delivering each feature as a sprint. From the survey taken, we achieved 85% of clients' requirements and 80% of user stories after the test launch.

I organized daily stand-up meetings, which were agile in nature, giving every team member a timebox to give their status update. At the end of every milestone, we had a retrospective, where we discussed improvements to deliver effectively on the project. We continuously improved on the features of the platform while collecting user feedback/surveys to help improve the scope and user stories. 75% of the staff I trained, were able to use the platform without requesting technical support from me.
